

Wellness Pharmacy's® comprehensive Autism Support Program, one of the very few of its kind, is dedicated to the following belief:

Addressing autism involves more than prescription drugs alone can achieve. Biomedical treatments address the biomedical causes of autism spectrum disorders: gastrointestinal abnormalities, immune dysfunctions, detoxification abnormalities and/or nutritional deficiencies or imbalances. All have been suggested as potential biomedical triggers of autism and many practitioners feel they are intertwined and should be integrated in with conventional therapies.

Wellness actively supports local Autism organizations. We are a corporate sponsor of the nation's leading non-profit Autism organization and we are committed to providing patients and parents everything they need to address and defeat autism—from research, information and support to quality products.

Wellness has created a one-stop resource for quality products, support and information to defeat autism. Wellness specializes in various Injectables, oral liposomal and IV Glutathione, TTFD, anti-fungals, Injectable Methyl B12 (prefilled syringes available), DMSA, DMPS, EDTA, Low Dose Naltrexone, numbing creams, Oxytocin and Secretin. Wellness also provides supplements from Allergy Research Group, American Biologics, BodyBio, CardioVascular research, Klaire Labs, MMSPRO, Kirkman Labs, and Nordic Naturals.

Wellness has agreed to offer 25% off of compounded medications and supplements at cost for those that receive a grant from Beyond the Limits. Because these medications can become costly, Wellness has chosen to offer these discounts to further your dollar and to fully support Beyond the Limits!
